

OBJECTIVE

To obtain the Applied Meteorologist Internship within the Data Science team at AccuWeather to utilize my expertise in climate modeling, Python-based data analysis, and QA/QC processes.

CAREER SUMMARY

- Maintained a 4.0 GPA as a Geosciences major specializing in Professional Meteorology.
- Conducted climate modeling for the USDA, evaluating RCP 4.5 and 8.5 scenarios.
- Proficient in Python coding, ArcGIS Pro, and SAS statistical software.
- Experienced in managing large meteorological datasets and ensuring data integrity.
- Recipient of the Tom Salem Memorial Scholarship and NWA/AMS travel award.
- Currently leading Honors Thesis research on severe weather risk perceptions.

EDUCATION

May 2026

Mississippi State University | 4.0 GPA

Bachelor of Science in Geosciences (Professional Meteorology)

Minors: Mathematics and Sociology

Honors: Shackouls Honors College, President's List (All Semesters), Stephen D. Lee Scholar, Tom Salem Memorial Scholarship.

Relevant Coursework: Synoptic Meteorology, Radar Meteorology, Python for Geosciences, Computer Methods in Meteorology, Physical Meteorology & Climatology I & II, Intro to Probability.

TECHINICAL SKILLS

- **Programming/Software:** Python (Cartopy, Pandas, Matplotlib), ArcGIS Pro, SPSS.
- **Meteorological:** Synoptic and Radar Analysis, Climate Modeling, QA/QC Processes.
- **Certifications:** CITI Program Certified (Social and Behavioral Research), NWS Skywarn Trained Storm Spotter.

RESEARCH & WORK EXPERIENCE

Aug. 2025- Present

Mississippi State University

Undergraduate Student Researcher – Honors Thesis

- Designed a survey to assess severe weather risk perceptions among international students to improve campus safety protocols.
- Analyzed survey responses from 200+ participants using statistical tests (Chi-square, Spearman's Rank, T-test).

- Collaborated with faculty advisors to ensure data integrity and consistency throughout the research lifecycle.
- May 2025 – Aug. 2025 **University of Central Arkansas**
Undergraduate Student Researcher – Wildfire Research
- Analyzed wildfire trends in the Ozark and Ouachita Mountains using ArcGIS Pro and Python.
 - Evaluated fire causes and climate patterns to identify spatial distributions of risk.
 - Communicated complex climate data to a multidisciplinary research team.
- Aug. 2024 – May 2025 **USDA – Agricultural Research Service in Starkville, MS**
Student Researcher – Climatology
- Modeled extreme rainfall and temperature trends under RCP 4.5 & 8.5 scenarios using Python.
 - Executed QA/QC processes on historical and future climate datasets to support sustainable agricultural practices.
 - Prepared predictive models to assist Dr. Feng in assessing long-term regional climate impacts.

EXTRACURRICULARS

- Jan. 2023 – Present East Mississippi Chapter of the NWA and AMS | Weather Club
- Aug. 2022 – May 2023 Spanish Club
